

We are actively seeking new members as we know some Turner ladies benefit greatly from the support provided by the group. It has come to our attention that a lot of ladies are slipping through the system. I hope that this will be rectified by improved communication between health staff and the society.

As a medical professional I would encourage you to support the suitable ladies or families to complete the form below.

We can provide your clinic with a stock of pamphlets to give to ladies who are unfamiliar to the group. This has the website address that the ladies can be directed to. Please do not hesitate to contact us if you require more pamphlets or referral forms.

We are most willing to support any research undertaken in your field and to promote any articles through the newsletter or website pertinent to our group.

We are most happy to be contacted to provide further information.
Many thanks for your time
